Matthew Piper
FULL STACK SOFTWARE ENGINEER

oepiper@gmail.com > 770-757-4946 > [LinkedIn](#) > [Github](#) > [Portfolio](#) > Marietta, GA

SKILLS

JavaScript, Node.js, React.js, Redux, HTML5, CSS, Python, bash, Git, Docker, and SQL

PROJECT EXPERIENCE

FunTappd >> React/Redux, Flask, Express, PostgreSQL, Docker   **[GitHub](#) > [Live](#)**
- A site that shows the user a selection of breweries along with the beers they offer and their rating
- The site uses react and redux along with a flask server
- Deployed on Render to a Docker container.

Fumblr >> React/Redux, Flask, Express, PostgreSQL, Docker, AWS   **[GitHub](#) > [Live](#)**
- A social media site that a user may create and view posts with images or text.
- The site uses react and redux on the front-end and uses a flask server on the back-end.
- All the images are uploaded to an AWS S3 bucket to make a more user-friendly experience.
- This site is deployed on render using a Docker container.

AirBnotB >> React/Redux, Express, PostgreSQL   **[GitHub](#) > [Live](#)**
- A site where the user can view locations and leave a review of it and give it a rating.
- This site uses react and redux along with express for the back-end server.
- The site is deployed on render.
